

# Manually Operated Valves

Kuhnke's manually operated valves have a wide variety of operators to satisfy most applications involving man-machine interface of pneumatic systems.

General purpose pushbuttons, toggle switches, knob operators, key switches, selector switches and foot pedals are available in 3/2 or 5/2 standard manual as well as air pilot assisted designs. An assortment of maintained position, spring return, latching and pneumatic reset versions round out the selection.

Manually operated valves are constructed of aluminum die cast and machined bodies. Valves with ports in both Metric and NPT threads are available to satisfy connection preferences. Spool and sleeve design provides dependable long life service.
